SIPROT®

The modern one PROTOKOLL MANAGEMENT System
MOUNTING STATION 9550CA.

For meeting rooms, a mounting station is available.

This is designed for 2 places.

Mobile tables that allow different furniture are each equipped with 1 installation station.
The tables can be connected according to the corresponding classification with 1 cable.

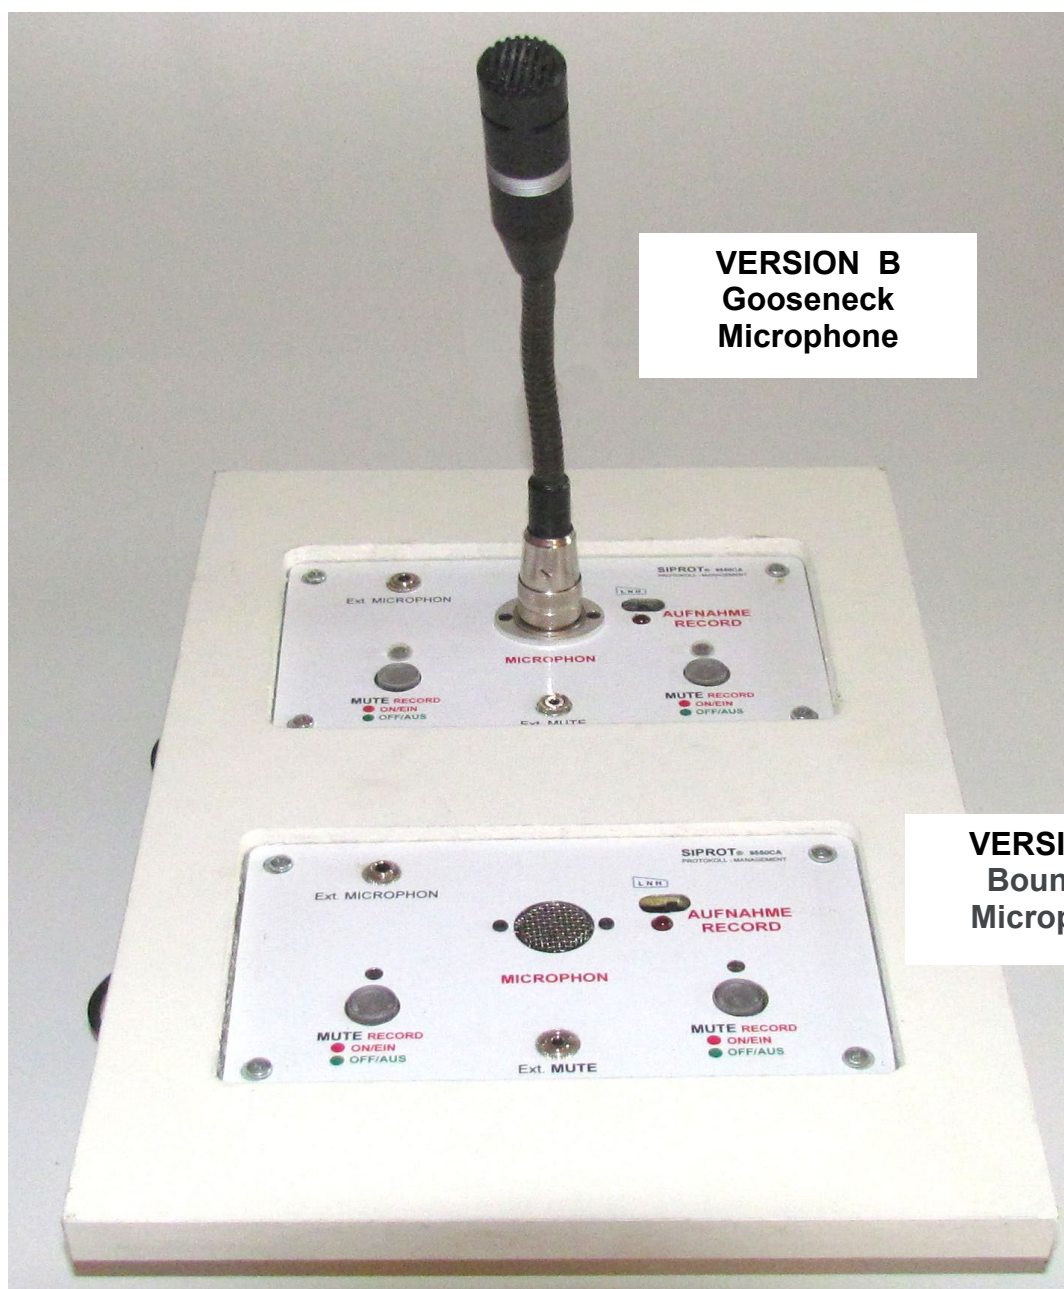

When not in use, the stations can be covered with a lid.

The installation station is therefore not visible.

The installation station is available with 2 different types of microphone:

- A. Boundary Microphone (just installed as in the mobile microphone)
- B. Gooseneck microphone (available in different lengths),
Gooseneck microphones come with a plug-in screw cap
Equipped connection.

Thus, the microphones are disassembled when not in use
and the station can also be covered with a lid.

All operating functions correspond to those
of the mobile microphone. Mutant operation is here
double populated, functions are synchronized.
