L = 83mm
B = 43mm
H = 27mm
Set weight 105g
(incl. cable)

Cable 4 x 0.4mm

Case black

The sound transmission SIPROT line out to the recording device is switchable: Microphone level or line level

Connections from the SIPROT system to recording systems (notebooks, Computer, digital recorder, etc.) often problems. The best microphone system will not help if the recording of sound from the SIPROT system is not possible.

For our customers, we have made some studies regarding sound transmission technology.

They were the foundations for the construction of our new connection box 9550ZFB.

The connection box 9550ZFB contains both the recording connection to the recording system, as well as a connection of headphones of the latest generation. Headphones makes it possible to check the sound quality from the SIPROT system and the recording system.

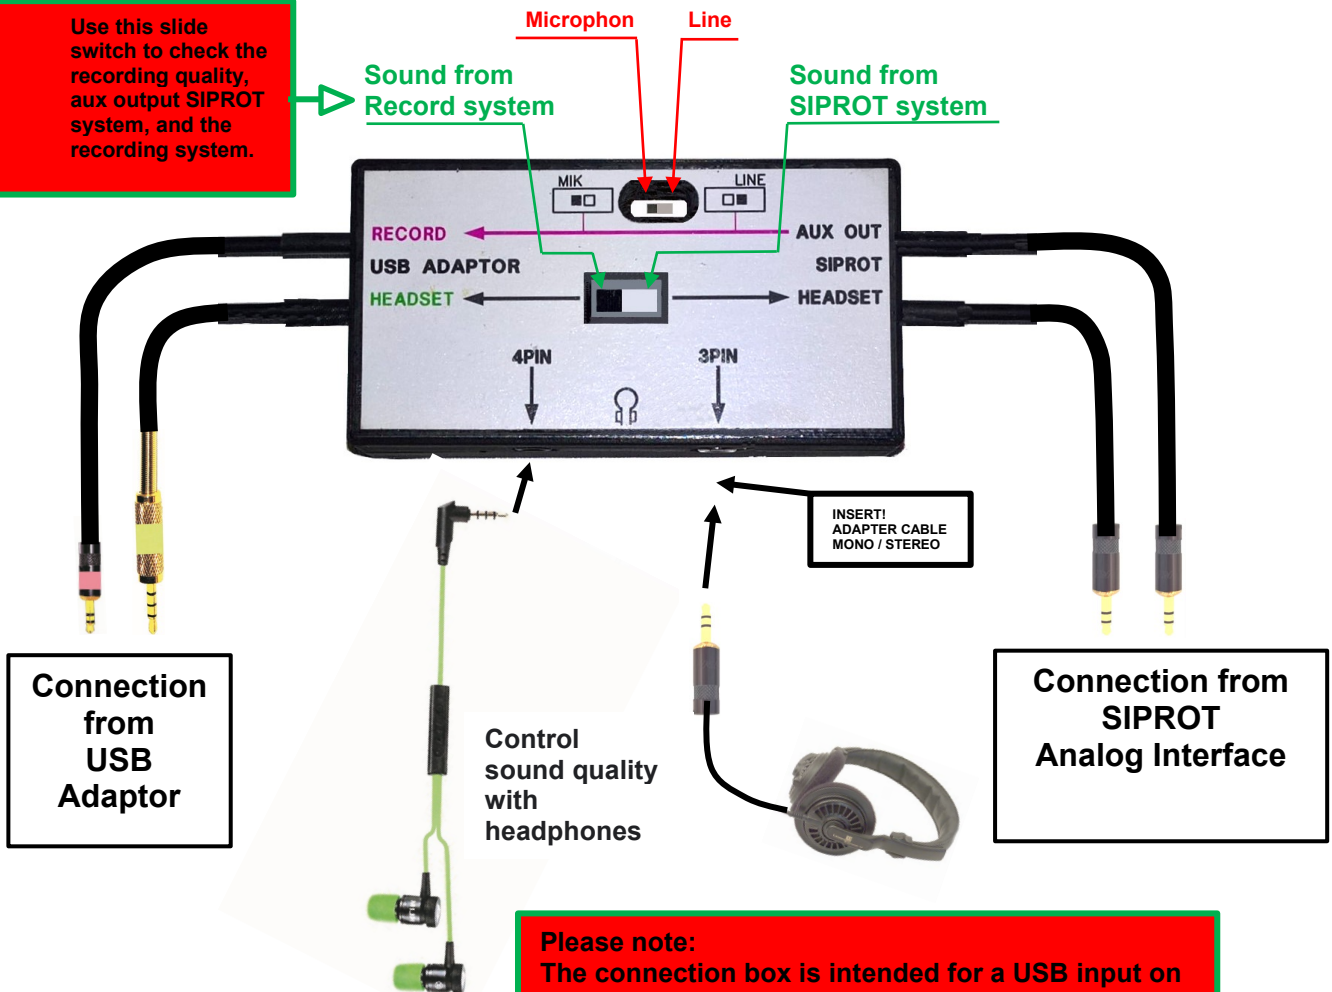

Adaptor cable MONO/STEREO, is supplied

RECORD SIGNAL ADJUSTMENT

This switch only needs to be set when setting up the system the first time.
Do not adjust afterwards.

Use this slide switch to check the recording quality, aux output SIPROT system, and the recording system.

Please note:

The connection box is intended for a USB input on the notebook. This requires a USB adapter with sound card.
See the installation information on the page E13.

Installation CONNECTION BOX 9550ZFB-1-V2

This connection technology is recommended for a professional, good, uncomplicated transmission of the analog audio signal from the SIPROT system to a digital one Recording device (notebook, digital recorder, etc.). Most of these devices have a USB-2 port.
