 See E  
 MICROPHON MUTE-connection  
 details backside

**Exchange instruction**  
**MUTE-button / cover**

- 1 Microphon with mute function
- 2 Suction cup tool provide  
Important: moisten the suction cup
- 3 Place the moistened suction cup tool on the button  
And press until the sucker stops at the button
- 4 Pull out the button with the suction cup tool
- 5 Store the suction cup tool and key button,  
(do not throw it away, it will be needed again if  
microphone needs to be converted again)

- 6 Place the key cover on the open hole
- 7 Press the key cover into the hole by hand,  
it has to lock in easily,  
there are 3 buttons cover with each microphone  
Green dot for holes with tolerance smaller  
Black for standard holes  
Red dots for holes with tolerance higher
- 8 The MUTE function off he microphone is OFF

**To the MUTE function:**  
 Take a fine knife ant lift the cover lightly be  
 careful not to damage the cover of the unit.  
 Now you can take the cover off.  
 Replace the butto on the switch housing, do not force!  
 Please note the following: the butten has 4 small  
 protruding legs. These must be placed in the existing  
 holes in the switch housing recesses. All 4 legs are the  
 same. «see 9, drawing refitting button»
